

Title: Orthopaedic Surgical Issues for Patients with MPS

IRB# 2009-076

Principal Investigator: Stephen Skinner, MD

Synopsis:

This study will look at medical and surgical interventions in relation to the orthopaedic and medical management of patients with MPS. The investigators will also conduct a retrospective review of x-rays, clinical reports, and exams from CHRCO's MPS patients to report the natural history, medical interventions and orthopaedic surgical corrections, data and functions as they relate to orthopaedic conditions in the MPS patients.
