

## A Protocol for Collecting Follow-Up Data on Children's Cancer Group (and Other) Studies CHO-LFTU-1

IRB# 1996-014

Principal Investigator: Carla Golden, MD

### Synopsis:

This is a protocol for collecting long term follow up data on patients enrolled on studies of the Children's Oncology Group. In order to continue to collect data, when a study is closed to accrual and all treatment and study procedures are complete, a study is rolled into the LTFU study to allow the continuation of data collection.
