

Thalassemia Data and Blood Specimen Collection System

IRB# 2003-070

Principal Investigator: Sylvia Singer, MD

Synopsis:

The thalassemia treatment center is conducting this research project with the Centers for Disease Control and Prevention (CDC). The purpose is to monitor the safety of the nation's blood supply. This project is expected to last for multiple years. The CDC is getting blood from people with thalassemia to set up a collection of blood to look for diseases that people can get from blood.
